

RECEIVED BY  
APT 34 AMDT

What is claimed is:

1. A patient restraint member for use in medical procedures, comprising:  
a sheet of thermoplastic material that can be softened upon heating so as to be formable  
into a shape corresponding to a patient's body part to be restrained and setting upon  
cooling to retain the shape;  
spaced apart groups of perforations in the sheets; and  
solid bands extending between the groups of perforations.
2. The patient restraint member of claim 1 wherein the sheet has a perimeter edge and  
the bands extend inwardly from the edge.
3. The patient restraint member of claim 2 wherein the bands intersect at a location  
spaced inwardly from the edge.
4. The patient restraint member of claim 2 wherein the bands extend perpendicular to  
the edge.
5. The patient restraint member of claim 2 wherein the bands extend in a non-  
perpendicular angle from the edge.
6. The patient restraint member of claim 2 wherein the bands extend completely  
across the sheet.
7. The patient restraint member of claim 1 wherein the sheet has a perimeter edge  
without perforations.
8. The patient restraint member of claim 1 wherein the solid bands extend across the  
sheet.
9. The patient restraint member of claim 1 wherein the spaces between the groups of  
perforations define the solid bands.

10. A patient restraint member for use in medical procedures, comprising:  
a partially perforated sheet of thermoplastic material that can be softened upon heating so  
as to be formable into a shape corresponding to a patient's body part to be  
restrained and setting upon cooling to retain the shape;

5 at least one non-perforated band extending at least partially across the sheet to enhance  
rigidity of the sheet.

11. The patient restraint member of claim 10 wherein the sheet has a perimeter edge  
and the band extends perpendicular to the edge.

10

12. The patient restraint member of claim 10 wherein the sheet has a perimeter edge  
and the band extends at a non-perpendicular angle to the edge.

13. The patient restraint member of claim 10 wherein the sheet has opposite side edges  
15 and opposite top and bottom edges, and the edges are non-perforated.

14. The patient restraint member of claim 13 wherein the band extends between the  
opposite side edges.

20 15. The patient restraint member of claim 10 wherein the band extends completely  
across the sheet.

16. The patient restraint member of claim 10 the sheet has a perimeter edge and further  
comprising a plurality of non-perforated bands extending inwardly from the perimeter  
25 edge.

17. The patient restraint member of claim 10 with the bands criss-cross the sheet.
